Education

PSG College of Technology, Coimbatore 2022 – 2026
Bachelor of Engineering in Computer Science and Engineering *CGPA: 7.98*

Sowdambikaa Matriculation Higher Secondary School, Trichy | *Higher Secondary Certificate: 87%* *2022*

Silver Jubilee Matriculation Higher Secondary School, Mayiladuthurai | *SSLC: 96%* *2020*

Technical Skills

Languages: Java, Python, TypeScript, SQL, C

Backend and Frameworks: Spring Boot, Spring Cloud Gateway, Flask, REST APIs, Microservices

Frontend: Angular, HTML, CSS

AI/ML: Generative AI, LLMs, Retrieval Augmented Generation (RAG), FAISS, Gemini API

Databases and Tools: MySQL, MongoDB, SQLite, Git, GitHub, Consul, Postman

Core Concepts: Object-Oriented Programming, Data Structures and Algorithms

Work Experience

Infosys May 2026 – Present
Digital Specialist Engineer (DSE)

- Completed training in Java, Spring Boot, and Angular; built **Infy LearnX**, a full-stack microservices learning platform, as the training project.
- Cleared the Java-based Karat technical interview, the screening step for allocation to Citi client projects.

Lysa Solutions, Coimbatore May 2025 – June 2025
AI Systems Intern

- Enhanced the frontend UI of an AI-powered system and modified backend database schemas to support new features, keeping existing components consistent.

Projects

Infy LearnX – Microservices-Based Learning Platform | *Angular, Spring Boot, Spring Cloud Gateway, Consul*

- Built a full-stack learning platform with an Angular frontend and five Spring Boot microservices: courses, trainees, assessments, registrations, and summary.
- Configured Spring Cloud Gateway for centralized API routing and Consul for service discovery; designed REST APIs connecting frontend and services.

LLM-Powered CLI Agent – Natural Language to Bash | *Python, FAISS, RAG, LLMs*

- Designed a local, offline CLI agent that converts natural language queries into Bash commands, with a RAG pipeline (FAISS, all-MiniLM-L6-v2) to reduce hallucinations.
- Benchmarked Mistral 7B, Code Llama 7B, Llama 2, Qwen 2.5, and Gemma 2; Mistral 7B achieved the highest accuracy of 70.7%.
- Added a safety filter and user confirmation step to block harmful system commands.

Civil Construction Financial Tracking System | *React Native, Flask, MySQL, Machine Learning*

- Developed a React Native app with a Flask and MySQL backend to manage project-wise expenses and payments, plus an ML model to predict future expenses from historical data.

Drip Advisor – AI Outfit Recommendation App | *React Native, Gemini API*

- Built a React Native app using the Gemini API (multimodal) to recommend outfits from wardrobe images, weather, calendar events, and user preferences.

Echo Trails – Location-Based Voice Notes App | *React Native, FastAPI, MongoDB*

- Built an app for recording and sharing voice notes at GPS locations, with time-based visibility, proximity alerts, and customizable discovery ranges.

Publications

LLM-Powered CLI Interface Agent: A Comparative Analysis. Presented and published at IEEE ICISCoIS 2026, PSG College of Technology.

Financial Tracking System for Civil Construction Projects. Presented and published at IEEE ICNGCS 2025, PSG Institute of Technology and Applied Research.
